5 Owner name search

An owner name search finds registration details recorded against an owner, including individuals and organisations.

A current search will find the most recent registration details. On the other hand, a point in time search will find registration details for a specific date.

You can search by:

- ▶ individual
- ▶ organisation
- ▶ Customer Reference Number (Department of Transport and Main Roads).

Note: This option is only available to certain state and federal government departments.

5.1 Search by individual

The individual owner name search has different options to help you retrieve the correct result:

Search options	Description
Given name and surname	<p>We recommend you enter the person's surname and given name. This will return a list of matches including middle names or initials.</p> <p>The surname field is mandatory. If a person has only one name, you should enter it into the surname field.</p> <p>Please enter at least two letters of the name to do a search.</p>
'Include similar sounding names' checkbox	<p>Use this for unusual spellings or hyphenated names. Enter the names without any hyphens or spaces.</p> <p>However, common names may return too many matches.</p>
Gender	<p>May help narrow searches for common names. If you haven't selected an option from the gender dropdown list, all genders will appear in search results.</p> <p>If you select 'not supplied', only those persons that don't have male or female gender recorded on the database show.</p>

Search options	Description
Date of birth	<p>Helps narrow searches for common names. Only enter a birthdate if you're certain that the information is correct.</p> <p>This search will return a list of all people born within one year of the date of birth you enter.</p>
Approximate age	<p>Helps narrow down a search for common names. It searches for people up to five years younger and older than the age you enter.</p> <p>You should only use this field if you're confident of the general age of the person that you're searching.</p>
